JOURNAL OF PHYSICAL ORGANIC CHEMISTRY, VOL. 11 (1998)

CONTENTS

VOLUME 11 NUMBERS 1–12

NUMBER 1

Mechanism of formation of benzothiazole-2-thiol
N. S. Isaacs, F. Ismail, M. J. Hilton and M. Coulson 1

Equilibrium acidities and homolytic bond dissociation enthalpies of *m*- and *p*-substituted benzaldoximes and phenyl methyl ketoximes
F. G. Bordwell, Y. Zhao and J.-P. Cheng 10

Convenient criterion for the distinction between electrophilic transfer reactions of electron-rich alkenes
N. L. Bauld, J. T. Aplin, W. Yueh, S. Endo and A. Loving 15

Reactions of 1,ω-bis(2-bromopyridinium)alkanes with hydroxide ion in aqueous solutions
C. Fernandez, V. G. Toscano, H. Chaimovich, M. J. Politi and N. Hioka 25

Oxidation of allyl alcohol by alkaline periodate in the presence of micro amounts of palladium(II)
G. A. Hiremath, P. L. Timmanagoudar and S. T. Nandibewoor 31

Kinetic and thermodynamic study of 2-bromo-2-methylbutane, 2-chloro-2-methylbutane and 3-chloro-3-methylpentane
L. C. Albuquerque, L. C. Moita, A. N. Simões, R. C. Gonçalves and E. A. Macedo 36

Lanthanide ion-induced hydrolyses of alkyl esters and amides of α-amino acids
T. Takarada, R. Takahashi, M. Yashiro and M. Komiyama 41

Kinetic study on the reactions of *O*-alkylisources with OH-acid compounds
R. Jaeger 47

Kinetic study of base-promoted elimination reactions of some 1,1,1-trihalo-2,2-bis(dimethoxyphenyl)ethanes in alcoholic solutions
G. Fontana, V. Frenna, M. Gruttadauria, M. C. Natoli and R. Noto 54

Volumetric properties and compressibilities of alkyltrimethylammonium bromides and sodium alkylsulphates in aqueous solution
R. Buwalda, J. B. F. N. Engberts, H. Hoiland and M. J. Blandamer 59

X-ray and NMR investigation of 25,27-dihydroxy-26,28-bis(diethoxyphosphoryloxy)-*tert*-butylcalix[4]arene in the *1,2-alternate* conformation
J. Lipkowski, M. Vysotsky, J. Slowikowska, V. I. Kalchenko and L. N. Markovsky 63

Inhibitory effect of DNA structure on the efficiency of reaction of guanosine moieties with a nitrenium ion
M. Novak and S. A. Kennedy 71

Forthcoming papers 77

NUMBER 2

Effects of oligooxyethylene linkage on intramolecular [2 + 2] photocycloaddition of styrene derivatives
Y. Nakamura, T. Fujii, S. Inokuma and Jun Nishimura 79

Stereodynamics of 4-substituted cyclohexenes. Formyl, vinyl and methyl substituents. Dynamic NMR and molecular mechanics studies
R. V. Concepcion, J. J. Breeyear, J. G. Jewett and C. H. Bushweller 84

Crystallographic study and molecular orbital calculations of 1,2,5-thiadiazole 1,1-dioxide derivatives
E. E. Castellano, O. E. Piro, J. A. Caram, M. V. Mirifico, S. L. Aimone, E. J. Vasini and M. D. Glossman 91

Stereospecific nucleophilic trapping of encounter complexes between photoexcited 1-cyanonaphthalene and norbornadiene
H. Weng and H. D. Roth 101

Effects of urea, Na^+ and Li^+ ions on the kinetics and mechanism of intramolecular general base-catalysed glycolysis of ionized phenyl salicylate in ethane-1,2-diol–acetonitrile
M. N. Khan 109

Theoretical studies on the gas-phase nucleophilic substitution reactions of benzyl chlorides with phenoxides and thiophenoxides
W. K. Kim, W. S. Ryu, I.-S. Han, C. K. Kim and I. Lee 115

Synthesis, structural, conformational and pharmacological study of new esters derived from 3-methyl-2,4-diphenyl-3-azabicyclo[3.3.1]nonan-9-ol as potential analgesics
I. Iriepa, B. Gil-Alberdi, E. Galvez, J. Sanz-Aparicio, I. Fonseca, A. Orjales, A. Berisa and C. Labeaga 125

Gain or loss of aromaticity in Diels–Alder transition states and adducts: a theoretical investigation
M. Manoharan and P. Venuvanalingam 133

Infrared spectra and conformation of methyl-substituted benzoic acids
P. Fiedler and O. Exner 141

***Ab initio* calculations on P—C bond cleavage in phosphoranyl radicals: implications for the biodegradation of organophosphonate derivatives**
M. Lim and C. J. Cramer 149

Forthcoming papers 155

NUMBER 3

Structural dependence of heterolytic bond dissociation energy of carbon–carbon σ bonds in hydrocarbons
T. Kitagawa and K. Takeuchi 157

Osmium (VIII)/ruthenium(III) catalysis of periodate oxidation of acetaldehyde in aqueous alkaline medium
D. L. Kamble and S. T. Nandibewoor 171

Theoretical study on pyrolysis and sensitivity of energetic compounds. Part 4. Nitro derivatives of phenols
J. Fan, Z. Gu, H. Xiao and H. Dong 177

Solute–solvent and solvent–solvent interactions in binary solvent mixtures. Part 7. Comparison of the enhancement of the water structure in alcohol–water mixtures measured by solvatochromic indicators
U. Buhvestov, F. Rived, C. Ràfols, E. Bosch and M. Rosés 185

Emperical treatment of solvent–solute interactions: medium effects on the electronic absorption spectrum of β-carotene
T. Abe, J.-L. M. Abboud, F. Belio, E. Bosch, J. I. Garcia, J. A. Mayoral, R. Norario, J. Ortega and M. Rosés 193

Mechanism of cycloaddition to indolizines
V. V. Simonyan, A. I. Zinin, E. V. Babaev and K. Jug 201

Effects of ionic and non-ionic miscelles on rate of hydroxide ion-catalyzed hydrolysis of securinine
N. H. Lajis and M. N. Khan 209

Unexpected rate enhancement in the intramolecular carboxylic acid-catalyzed cleavage of *o*-carboxybenzohydroxamic acid
M. N. Khan 216

Solvolysis of benzylic chlorides with extended charge delocalization. α-*tert*-Butyl-(2-naphthyl)methyl, 9-fluorenyl and monosubstituted benzhydryl chlorides
K.-T. Liu, Y.-S. Lin and M.-L. Tsao 223

Forthcoming papers 230

NUMBER 4

Editorial
J. B. Lambert, C. J. Cramer and H.-J. Schneider 231

Molecular orbital calculations on the P—S bond cleavage step in the hydroperoxidolysis of nerve agent VX
E. V. Patterson and C. J. Cramer 232

Conformational analysis of a 12-membered crown dithioether in solid state and in solution
V. V. Samoshin, E. I. Troyansky, D. V. Demchuk, R. F. Ismagilov, V. A. Chertkov, S. V. Lindeman, V. N. Khrustalyov and Y. T. Struchkov 241

The Menshutkin reaction of benzyl *p*-toluenesulfonates with *N,N*-dimethylanilines. Evidence for the duality of SN̂1 and SN̂2 mechanisms
S. H. Kim, S.-D. Yoh, C. Lim, M. Mishima, M. Fujio and Y. Tsuno 254

Solvent effects on CO stretching frequencies of some 1-substituted 2-pyrrolidinones
J. B. F. N. Engberts, G. R. Famini, A. Perjéssy and L. Y. Wilson 261

Correlation of the rates of solvolysis of the *N,N*-diphenylcarbamoylpyridinium ion
D. N. Kevill, M. W. Bond and M. J. D'Souza 273

Colloidal CdS-induced photocatalytic reaction of 2-methylindole-mechanistic analysis of oxidation of indoles
A. Kumar and S. Kumar 277

Solvent effects on infrared spectroscopic and calorimetric characteristics of aliphatic ketones in binary solvent mixtures
V. B. Novikov, A. A. Stolov, V. V. Gorbatchuk and B. N. Solomonov 283

Forthcoming Papers 290

NUMBER 5

TENTH ANNIVERSARY SPECIAL ISSUE

Preface
J. B. Lambert 291

Flash photolytic generation and investigation of short-lived reaction intermediates: a case study
A. J. Kresge 292

Principles of physical organic chemistry for molecular architecture and functions
H. Iwamura 299

Non-cross-linked and cross-linked poly(alkyl)methyldiallylammonium halides): synthesis and aggregation behavior
G.-J. Wang and J. B. F. N. Engberts 305

Metal-catalyzed carbenoid reactions with iodonium and sulfonium ylides
P. Müller, D. Fernandez, P. Nury and J.-C. Rossier 321

Is the brain ready for physical organic chemistry?
D. A. Dougherty 334

Vicarious nucleophilic substitution of hydrogen. Mechanism and orientation
M. Mąkosza and A. Kwast 341

Studies of reactive intermediates using matrix and gas-phase techniques
C. Wentrup and R. Flammang 350

Heterogeneous catalysis of organic reactions
P. Laszlo 356

Unusual reactivity of highly strained cyclophanes
F. Bickelhaupt and W. H. de Wolf 362

NUMBER 6

Editorial
J. B. Lambert 377

***Ab initio* and molecular mechanics (MM3) calculations on alkyl and aryl boronic acid**
X. Chen, G. Liang, D. Whitmire and J. P. Bowen 378

^{17}O NMR studies on α-diamides
G. Cerioni, A. G. Giumanini and G. Verardo 387

Theoretical study of the tautomerism of 8-azaadenine
J. G. Contreras, S. T. Madariaga and J. B. Alderete 392

Effects of sulfenyl, sulfinyl and sulfonyl groups on acidities and homolytic bond dissociation energies of adjacent C—H and N—H bonds
F. G. Bordwell and W.-Z. Liu 397

Gas-phase thermolysis of *N*-methyl-*N*-phenyl-*tert*-butylsulfenamide and morpholinyl-*tert*-butylsulfenamide
G. Martin, J. Ascanio and J. Rodriguez 407

NMR and semi-empirical study of the tautomerism of 2,2′-bisbenzimidazolyl
C. Zucco, E. L. Dall'Oglio, G. V. Salmória, H. Gallardo, A. Nevez and M. C. Rezende 411

Electrochemical study of the π* probe dye 5-nitro-5′-dimethylamino-2,2′-bisthiophene
E. Norambuena and M. C. Rezende 419

Host–guest interactions of calix[4]resorcinarenes with benzene derivatives in conditions of reversed-phase high-performance liquid chromatography. Determination of stability constants
J. Lipkowski, O. I. Kalchenko, J. Slowikowska, V. I. Kalchenko, O. V. Lukin, L. N. Markovsky and R. Nowakowski 426

Forthcoming papers 436

NUMBER 7

A new approach to theoretical estimation of inductive constants
A. R. Cherkasov, V. I. Galkin and R. A. Cherkasov 437

Oxidation of mandelic acid by alkaline potassium permaganate. A kinetic study
R. G. Panari, R. B. Chougale and S. T. Nandibewoor 448

Rate enhancement of 1,3-dipolar cycloaddition of *N*-methyl-indole: the singular role of Grignard reagents
T. Benincori, F. Sannicolò, L. Trimarco, L. Bonati, S. Grandi, D. Pitea and C. Gatti 455

Base-catalysed hydrolysis of γ-lactones: reactivity–structure correlations for 3-(substituted phenoxy- and thiophenoxymethylene)-(*Z*)-1(3*H*)-isobenzofuranones
K. Bowden, R. J. Ranson, A. Perjéssy, M. Lácová, O. Hritzová and W. M. F. Fabian 467

The ring inversion of silacycloheptatriene and cycloheptatriene. Comparison of the 'aromaticity' of planar and boat conformaters estimated by nucleas-independent chemical shift
T. Nishinaga, Y. Izukawa and K. Komatsu 475

Selective arylation of exocyclic *N*-position of 2-pyrimidylnitrenium ion photolytically generated from tetrazolo(1,5-a)pyrimidine in the presence of trifluoroacetic acid
H. Takeuchi and K. Watanabe 478

Improved method of calculating group polarization effects: constants σ_{π}
P. Čársky, P. Nauš and O. Exner 485

Kinetics of the hydrolysis of cyclic *N*-substituted sulfamides: 4-amino-2-cyclohexyl- and 4-amino-2-phenethyl-2,3-dihydro-3-oxo-1,2,5-thiadiazole 1,1-dioxides
M. F. Rozas, E. L. Svartman, M. V. Mirífico and E. J. Vasini 489

Improved Yukawa-Tsuno equation and the substituent effect on the pyridine basicity
J. C. R. Reis, M. A. P. Segurado and J. D. G. de Oliveira 495

Forthcoming Papers 504

NUMBER 8–9

ORGANIC REACTIVITY SPECIAL ISSUE

Editorial
J. Fastrez and M.-F. Ruasse 505

A perspective on bilogical catalysis
S. J. Benkovic 508

Imperatives for enzymatic catalysis of isomerization of sugars and sugar phosphates
J. P. Richard, J. Crugeiras and R. W. Nagorski 512

Binding of protons and zinc ions to transition states for tautomerization of α-heterocyclic ketones: implications for enzymatic reactions
S. J. Eustace, G. M. McCann, R. A. More O'Ferrall, M. G. Murphy, B. A. Murphy and S. M. Walsh 519

***In vivo* formation of C—S bonds in biotin. An example of radical chemistry under reducing conditions**
A. Marquet, D. Florentin, O. Ploux and B. Tse Sum Bui 529

Genetic engineering approaches to enzyme design and mechanism
L. Feng, Y. Li and J. F. Kirsch 536

Molecularly thin films of metallodendrimers
W. T. S. Huck, F. C. J. M. van Veggel, S. S. Sheiko, M. Möller and D. N. Reinhoudt 540

Gated molecular and biomolecular optoelectronic systems via photoisomerizable monolayer electrodes
I. Willner, A. Doron and E. Katz 546

Photoinduced electron transfer and strand cleavage in pyrenyl–DNA complexes and adducts
N. E. Geacintov, K. Solntsev, L. W. Johnson, J. Chen, A. D. Kolbanovskiy and V. Y. Shafirovich 561

Mono- and polynuclear ruthenium(II) complexes, photo-probes and reagents for targeted DNA sites
A. Kirsche-De Mesmaeker, C. Moucheron and N. Boutonnet 566

New DNA-binding ruthenium(II) complexes as photoreagents for mononucleotides and DNA
C. Moucheron and A. Kirsch-De Mesmaker 577

Hydrolysis of *N*-methyl-*N*-nitroso-*p*-toluenesulphonamide in micellar media
L. García-Río, P. Hervés, J. R. Leis, J. C. Mejuto and J. Perez-Juste 584

Intermediates in organometallic and organic chemistry: spectroscopy, polymers, hydrogenation and supercritical fluids
M. Poliakoff and M. W. George 589

Rhodium(II)-catalyzed nitrene transfer with phenyliodonium ylides
P. Mueller, C. Baud and I. Naegeli 597

From olefin cyclopropanation to olefin metathesis through catalyst engineering: recent applications of olefin metathesis to fine organic synthesis and to polymer chemistry
A. F. Noels and A. Demonceau 602

Conjugate addition of water to α-carbonylcarbenes
Y. Cheng, E. A. Jefferson, A. J. Kresge, V. V. Popik and R.-Q. Xie 610

Comparison of ΔG°_{Acid} gas phase, and kinetic acidities measured in methanolic sodium methoxide
H. F. Koch, J. C. Biffinger, M. Mishima, Mustanir and G. Lodder 614

Photochemical removal of tosyl group from 5′N position of 5′-amino pyrimidine nucleosides: synthetic applications
W. Urjasz and L. Celewicz 618

Chemistry of secologanin. Part 5. Graph analysis of the acidic glycosylation of vincoside derivatives
L. Károlyházy, A. Lukáts-Patthy and L. F. Szabó 622

Predicting the rates of proton transfer reactions: a simple model using equilibrium constants and distortion energies
J. P. Guthrie 632

Linear free enthalpy relationships: a powerful tool for the design of organic and organometallic synthesis
H. Mayr, O. Kuhn, M. F. Gotta and M. Patz 642

Aromaticity of pericyclic reaction transition structures: magnetic evidence
H. Jiao and P. von Ragué Schleyer 655

Absolute proton affinity of some substituted toluenes: the additivity rule of thumb for the *ipso* attack
M. Eckert-Maksić, A. Knežević and Z. B. Maksić 663

Theoretical investigation on the abnormal Reimer–Tiemann reaction
R. Castillo, V. Moliner, J. Andres, M. Oliva, V. S. Safont and S. Bohm 670

Are phosphaterahedrane and diphosphatetrahedrane phosphorus or carbon bases?
M. Yáñez 678

Forthcoming papers 684

NUMBER 10

Radical bromination of 1,1- and 1,2-diphenylethylenes in 1,2-dichloroethane
G. Bellucci and C. Chiappe 685

Complexation of basic amino acids by water soluble calixarene sulphonates as a study of the possible mechanisms of recognition of calixarene sulphonates by proteins
N. Douteau-Guével, A. W. Coleman, J.-P. Morel and N. Morel-Desrosiers 693

Kinetics and mechanism of cerium(IV) oxidation of primary and secondary alcohols catalysed by chromium(III)
L. V. Nimbalkar, A. M. Chavan and G. S. Gokavi 697

Kinetic mechanism for dimerization of an α-thioamide substituted benzyl carbocation in aqueous solution
K. B. Williams and J. P. Richard 701

Electrophilic aromatic substitutions: reactions of hydroxy- and methoxy-substituted benzenes with 4,6-dinitrobenzofuroxan: kinetics and mechanism
F. Terrier, M.-J. Pouet, J.-C. Halle, E. Kizilian and E. Buncel 707

Cyclizations in the homolytic reactions of unsaturated nitriles with *tert*-butylmercury halides in the presence of proton donors
G. A. Russell and P. Chen 715

Reaction of phenyllithium with *E*-cinnamaldehyde: survey of several variables and their influence on the mechanism of reaction and in organic synthesis
N. S. Nudelman, H. G. Schulz and G. V. García 722

Substituent effects on the electrochemical oxidation on *N,N′,N″*-triphenyl-1,3,5-triamino-benzenes
D. T. Glatzhofer and M. C. Morvant 731

Hydrogen-bonding-based thermochromic phenol–amine complexes
T. Mizutani, H. Takagi, Y. Ueno, T. Horiguchi, K. Yamamura and H. Ogoshi 737

Solvent dependence of pyranine fluorescence and UV-visible absorption spectra
N. Barrash-Shiftan, B. Brauer and E. Pines 743

1:1 Crystal complex of 2′,6′-dimethoxyflavone and 2,6-dimethoxybenzoic acid. Relationship of pK_a to x-ray hydrogen bond data
J.-C. Wallet, E. Molins and C. Miravitlles 751

Stability and nitrosation efficiency of substituted *N*-methyl-*N*-nitrosobenzenesulfonamides
L. García-Río, J. R. Leis, J. A. Moreira and F. Norberto 756

Forthcoming papers 761

NUMBER 11

An *ab initio* study of 1-azabicyclo[1.1.0]butyl and isomeric cations
R. H. Higgins and B. Kidd 763

Double fragmentation in cation radicals. An example in the NADH analogues series
A. Anne, S. Fraoua, J. Moiroux and J.-M. Savéant 774

Conformational analysis of substituted 5,6,7,8-tetrahydrodibenzo[*a*,*c*]cyclo-octene: comparison of ^{1}H NMR, molecular mechanics and semiempirical methods
P. Rashidi-Ranjbar, J. Najafpour and F. Piri 781

Kinetic and equilibrium studies of σ-adduct formation and substitution in the reactions of sulfite ions with some alkyl and aryl ethers and thioethers
M. R. Crampton and A. J. Holmes 787

Kinetic and spectroscopic study of slow-binding inhibition processes in aldolase
C. Blonski, T. Gefflaut and J. Perie 793

Effect of sulfuric acid on reactions of peroxymonosulfate ion with sulfides and thiol esters
C. A. Bunton and A. Kumar 803

Correlation analysis of UV spectral data of some phenylhydrazones and semicarbazones by the dual-parameter equation. Observation of three types of behaviors of the λ_{max} values induced by the polar effects of substituents
W. F.-X. Ding and X.-K. Jiang 809

Improved method for estimating the ZFS parameter *D* for delocalized biradicals
K. A. Sandberg and D. A. Shultz 819

Cation radical cycloaddition polymerization: Diels–Alder copolymerization
N. L. Bauld, J. T. Aplin, W. Yueh and S. Endo 825

An *ab initio* molecular orbital study of the conformational energies ($-\Delta G^\circ$ or *A* values) of 4-alkyltetrahydro-2*H*-thiopyrans (tetrahydrothiopyrans, thiacyclohexanes, thianes)
F. Freeman, A. Phornvoranunt and W. J. Hehre 831

Forthcoming papers 840

NUMBER 12

REVIEW COMMENTARY
Reactant–solute encounters in aqueous solutions studied by kinetic methods: hydration cosphere overlap and camouflage effects
J. B. F. N. Engberts and M. J. Blandamer 841

Effect of solvent composition on the acidity of phenols in dimethyl sulfoxide–water mixtures
R. M. Tarkka, I.-H. Um, H.-Q. Xie, A.-P. Chatrouse, F. Terrier, S. Hoz and E. Buncel 847

Dipolar moments of polyenic oligomeric systems. Part I. A one-dimensional molecular wire model
R. G. E. Morales and C. Gonzalez-Rojas 853

***Ab initio* MO study of benzylic cations. Part 3. Protonated benzoyl derivatives**
K. Nakata, M. Fujio, M. Mishima, Y. Tsuno and K. Nishimoto 857

Solvolysis of isodrin derivatives. Evidence of Long-range σ-participation in the stabilization of carbocations
T. J. Chow 871

Intramolecular thermal ($4\sigma + 2\pi$) dyotropy: primary ^{2}H kinetic isotope effects. Experimental limiting barrier parameters for quantum tunnelling in ^{2}H transfer processes and mechanistically significant substituent effects
K. Mackenzie, K. B. Astin, E. C. Gravett, R. J. Gregory, J. A. K. Howard and C. Wilson 879

Conformational effects on the mechanism of acid-catalyzed dehydration of hexitols
Lj. Došen-Mićović and Ž. Čeković 887

Structural and spectroscopic investigation of 1-amino-2,4-dinitrobenzenes
M. V. Remedi, E. I. Buján, R. Baggio and M. T. Garland 895

A tris-phenylphenol N_8O_3 Schiff-base cryptand: structural characterization and flourescence titration for lanthanide coordination
S.-Y. Yu, B. Wu, X.-J. Yang, W.-J. Zhang, X. Wu and T. Kusukawa 903

Forthcoming papers 912

Author index 913

Keyword index 915
